

Cynthia, here is what we have accomplished so far:

- Created database with fake data for owners, animals, and notes
- Edited the website to make it look better
- Readied webpages to be put on a server
- Fine tuned the navigation bar
- Added login drop down menu to the navigation bar
- Added green checks and black x on the tables

Adding the ability for owners and admins to actually login and use the navigation bar was on the schedule for milestone 1 but was pushed back to the final product due to time constraints. Rest assured we are working hard and hope this doesn't cause any inconvenience. You can view the work we have done so far at <https://github.com/Tyler491/pawstocare> where there is a more detailed description of the website. Thank you
